

Madhulika Utlā

madhu.myskss@gmail.com (478) 588-7289 linkedin.com/in/madhulika-utla Atlanta, GA

Coding Skills

Languages: Java, C#, Python, SQL, R-Studio

Frameworks: Dia, NI Multisim, .NET, PyTorch

Software: Visual Studio, Jira, Confluence, Bitbucket, Apollo Studio, Power BI, GitHub

Education

Kennesaw State University

Aug 2022 – Dec 2025

Bachelor of Science in Computer Science; Concentration in Artificial Intelligence

GPA: 3.6

President's List

Graduation: December 2025

Strothoff International School

Aug 2020 – Jun 2022

International Baccalaureate (IB) Diploma Programme – Germany

Experience

Boehringer Ingelheim — AI Intern

May 2025 – Aug 2025

Information Technology – Artificial Intelligence, Duluth, GA

- Developed AI-driven automation tools using Python, SQL, and internal APIs to streamline workflows.
- Built and maintained data pipelines for account deduplication and entity matching using Apollo Studio and GraphQL.
- Collaborated with engineers, data scientists, and product managers in Agile teams to deliver automation solutions.
- Utilized Jira, Confluence, and Bitbucket for documentation, ticket management, and version control.
- Supported AI model testing, debugging, and evaluation in a fast-paced pharmaceutical environment.

TJ Maxx — Retail Associate

Sept 2025 – Present

- Built customer relationships through persuasive communication, upselling products and promoting the TJ Maxx credit card to drive sales.

Crumbl — Retail Associate

Apr 2025 – May 2025

Projects

AI Automation Tools (Boehringer Ingelheim)

May 2025 – Aug 2025

- Contributed to an internal AI automation project by building scripts to detect duplicate accounts and improve data quality.
- Used Python and API integrations to automate repetitive workflows, reducing manual review effort.
- Assisted in testing ML-based scoring models and documenting results for internal stakeholders.

Neural Language Networks — CLIP Model Implementation

2025

- Implemented a CLIP-style multimodal learning architecture to align image and text embeddings for cross-modal understanding.
- Evaluated the impact of different backbone models on performance, efficiency, and security, comparing VGG and ResNet for image encoding and BERT-based variants for text encoding.
- Analyzed trade-offs between model accuracy and computational efficiency across multiple encoder configurations.

Power BI Sales Performance Dashboard

Aug 2023 – Present

- Engineered a BI solution using Power BI by integrating cleaned datasets, designing relational schemas, and defining consistent KPI logic using DAX.
- Optimized dashboard performance by reducing data redundancy, simplifying transformations, and improving model relationships.
- Collaborated with a cross-functional team to align technical decisions with user needs and presentation requirements.
